

THE APARTMENTS AT
MARK CENTER

March 2016

Dear Resident,

We hope you have fared well through the winter and that spring is finally on its way!

In 2012, the City of Alexandria approved the Beauregard Small Area Plan and, as you may know, the redevelopment and renovations that will eventually take place will be consistent with that plan.

The first phase of redevelopment planned at Mark Center will include a mixed-use town center that will offer new apartments as well as additional community features. We are excited to be able to deliver quality neighborhood amenities in a convenient location to all residents such as retail, restaurants, neighborhood services and a green space for community events and gatherings.

Just as a reminder, the first phase of construction will occur gradually over several years and no development will begin before 2018. In order to keep residents informed, The JBG Companies plan to notify any residents who will be affected by redevelopment at least nine months prior to any construction activity. In addition, The JBG Companies will send out the required written 120-day advance notice prior to any development activity.

Please expect letters every other month, with the next one arriving in May. Once the pace of progress increases, we will send more frequent mailings to keep you updated. For more information and to sign up for our email list, please visit www.MarkCenterInfo.com.

As always, thank you for your patience!

Sincerely,
The JBG Companies
